Message From CEO

AMANO is a company specializing in parking that has grown into an overwhelming no.1 company beyond No.1 in the parking industry.

AMANO Korea CEO Jeon Myung-jin

Established in 1996 as the Korean corporation of Amano, a global professional parking company, Amano Korea succeeded in localizing 100% of parking control products that have been dependent on imports. Based on its own technology developed through continuous research and development and facility investment, Amano Korea exports its products and solutions to the world including Japan, Europe, the Americas, Southeast Asia and Central and South America and provides system technology

In particular, we provide the best parking solution that was created by combining Japanese mechanism technology and Korean IT technology. Hardware with the best safety and durability, and the system equipped with the best software specialized in the field are Amano Korea's competitiveness and a differentiating strategy from other systems,

Smart technology centered rapid changes are taking place also in parking lot such as Parking Control System, Parking Guidance/ Video positioning system, camera-based security solutions etc,

Amano Korea is leading the market based on its own technology of developing and producing all of these systems. We are also developing a variety of related businesses including smart parking system with parking lot as platform,

We are conducting research and development with innovative thinking that combines mobile settlement service, electric car charging service and web discount not constrained by space, easy commutation ticket registration and extension service through mobile, parking lot information disclosure business which enables anyone to use parking lot conveniently, O2O business linking parking lots operated by Amano Korea to customers and are aiming at convenience for users and increased revenue and public benefits for managers. Amano Korea is not just a system and service provider. We provide optimal solution and parking operation consulting so that more operators can do the parking lot operation business more easily and operate a specialized integrated control center that enables unmanned parking lots in real time 24/7, 365 days a year. In addition, not settling for the present of No. 1 in the industry, we have been providing solutions by combining Mobile / Web / Cloud technology with the parking system and parking lot management business for several years, and are introducing future technologies such as AI / IOT / Big Data / AR / VR technology into the parking system,

With the goal of developing the world's best advanced parking system and being the world's best parking operator, we will go with you while always thinking that now is the starting point,

AMANO KOREA History

- 2021**

Bukit Bintang City Center in Malaysia
Malaysian KL118(PNB118)
Built the parking control system of Hanyang University Seoul Hospital
Built the parking control system of Uijeongbu Eulji Medical Center, Eulji University
Built the parking control system of the 63 Building in Yeouido
Built the parking control system of Geumgang Housing Dongtan IX Tower
Built the parking control system of Eileen-garden Apt, in Seongseo-dong, Daegu

Parking lot of Bobae Market in Bangkok, Thailand
Completed Yeouido Pac,1
Completed Godeok Gracium
Completed Starfield Anseong Branch and Daejeon Science
The Head Office of the Integrated Center in Yeongdeungpo reached 1,000 management sites
Opened the Integrated Center Magok Branch / Was separated from the Integrated Center of the Head Office
Won the grand prize in Korea Leading Company Awards for 4 years in a row

Tokyo City Air Terminal in Japan
Developed and released the imbedded parking system
Developed and released the floor-typed guidance light
Received the prize from the minister of SMEs and Startups (MSS)
Won the grand prize in the parking control sector of the 2019 Security Awards
Received an order and completed Starfield Bucheonokgil Branch
Received an order and completed Starfield Myeongji Branch
Received an order and completed IKEA Giheung Branch
Established Jeju Branch (Secured total 24 branches including the head office and Gumi factory)

Branz BSD in Indonesia
Millenium Centennial Center in Indonesia
Released new type smart equipment (LPR/Parking breaker /Card fare adjustment machine)
Received an order of Starfield Wirye
First cracked 100 billion in sales in the parking system industry (109,4 billion)
ICT Innovation received commendation from the minister of Science and Technology
Completed development of a high-speed battery charger for EVs,

Completed parking system of Incheon International Airport 3rd stage parking lot
Established Gangwon Branch
Opened and renewed 24-hour integrated control center
Completed Shinsegae Starfield Goyang Samsung
Completed Ikea Goyang Samsung
Completed LG Science Park Magok
Signed Korea Expressway Corporation parking lot activation MOU
Awarded Korea Leading Company Grand Prize
KT / ICT infrastructure support service agreement

Opened Gangseo Office
Performed overseas travels and events to celebrate the 20th anniversary of the founding
Took the order of Star Field Hanam
Exported Ultrasonic Guidance System to Indonesia
Developed and released Integrated LPR

Took the order of Three-step Parking System of Incheon International Airport
Developed and released Integrated LPR
Opened 70 field offices interacting with the integrated Call Center
Took the order of Road LPR Parking System of Bangbae Station
Opened AMANO SYSTEM Show Room Renewal
Supplied and installed LED Light Control System interacting with Front Camera Parking Guidance System
Exported GT Ver, Unmanned Parking Fee Calculation System & Barcode Parking System to China

Increased KRW 20,6billion of capitall
Established Cheonan office, Daegu office, and Gangbuk 2 office
Took the order of Parking System of Garak-dong Agricultural & Marine Products Market and established the system
Released Slim Type LPR(Self Control)
Acquired more than 1000 times of performance test of LPR light
Released New Barcode System(GT2300K, GT6300K, and GT7300K)

2013

Established IS System at nine nationwide airports
Established the tan region offices (Gangnam, Gangbuk, and Gyeongginambu offices)
Develoepd and released New Unmanned Parking Fee Calculation System
Developed LED Dimming Control System
Registered the patent related to Road LPR System

2012

Increased KRW 10,6billion of capital
Established License Plate Registration System at Samsung Medical Center first in the Korea
Developed Intelligent Parking Guidance Front Camera System
Exported LED Light Control System to Japan
Advanced in the Mongolian market with Parking Control System

2011

Established Parking Control System at Olympic Park and Shindorim D-Cube City
Established Parking Control System at Sky Park in Gimpo
Established Integrated Control System at 47 parking lots of KORAIL Network

2010

Increased KRW 4,5billion of capital
Replaced, controlled and managed Parking Control System of Seoul National University
First acquired A- of enterprise credit evaluation in the industry (Korea Enterprise Data)
Newly established LED Department/ Released LED Solution [ULXMILE]

2009

Developed and launched Parking Guidance system and parking location guidance system
Completed Yeongdeungpo Time Square (Ultrasonic Parking Guidance and positioning system)
Constructed production line and Established "Gumi Factory"
Constructed Integrated management of parking lot in Kimpo city
Constructed unmanned integration system in Ansan 9 Region
Developed and launched License Plate Recognition (LPR)
Organized by Current Economic Magazine "GLOBAL MANAGEMENT AWARDS 2009" Selected as global management award

2008

Opened Gwangju Office in the southwestern region of Korea
Introduced Unmanned Bicycle Management System
Released Ultrasonic Vehicle Guidance System

2007

Acquired INNO-BIZ
Released GT Series Card In/Out System
Released All-in-One License Plate Recognition(LPR) system
Constructed Self Parking Lot of Kyung Hee Univeristy Medical Center (2B & 6F)
Opened Busan Office

2006

Registered as Venture Business
Established Gangnam Customer Service Center, opened Daejeon Office
Acquired ISO 14001
Established Unmanned Parking System of Seoul Asan Medical Center

2005

Installed Unmanned Parking System & Integrated Control Operation System at the transfer parking facilities in Cheonho, Bokjeong, and Hakyeowool
Developed and released Unmanned Free Calculation System (exit pay system NT-7600K)

2004

Started to run parking lot operation(Yonsei University/Bupyeong Isvill Outlet)
Exhibited products in Shanghai Parking Show of China

2003

Acquired CE Mark for Barrier Gate(TF-1630KN)
Relocated office building to the place at Yeongdeungpo-gu, Seoul
Developed and released Unmanned Parking Fee Calculation System (prepay-type new NT-7900)
Established corporate research institute

2002

Applied for the patent of Hospital OCS Interaction Parking Control System
Exported Barrier Gate (Singapore/Hongkong/Malaysia/Australia/Tiwan/China)
Started to provide clean system service

2001

Developed Season Ticket Control Program (AMANO Tag System)
Developed and released PC Parking Fee Calculation System(TFK-5620)
Acquired ISO 9001

1996

Established AMANO KOREA CO., LTD.
Developed Korean Version of Parking Lot Control Program[Aspect]
Registered in Korea International Trade Association

Company Intro

Introduction to Company

Company Name	AMANO Korea Corp.
Business Status	Manufacturing/ Wholesale / Service
Business Type	Trade/Parking Facility/Bicycle System/Parking Service/LED
Establishment Date	Apr. 17, 1996
Capital	KRW 31 billion (₩ 31,000,000,000)
Annual Sales	KRW 140,797,369,874 (as of the end of 2021)

Parking Control System

Parking Control System

For safe operation of each other, vehicles coming from and going to the parking lot provide the convenient and safe use to drivers through parking facilities and optimized system to vehicles and drivers and administrators promote smooth and efficient parking management with a minimal of management personnel.

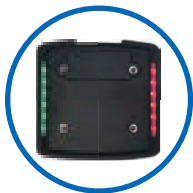

Ultrasonic Parking Guidance System

An Ultrasonic Parking Guidance System is a system guiding rapid parking by monitoring empty parking space in real time and providing parking lot information to drivers with an ultrasonic sensor installed in the parking space. The parking lot administrator monitors various statistical data and situations in real time.

Parking Guidance sign

Parking space indicator

Ultrasonic sensors

Managing Parking Guidance System

It is a system of analyzing images of parking side cameras (3 sides, up to 4 sides) of 5 million~12 million pixels and not only guides parking status information to customers by being installed on the opposite side of the vehicle but provides real time parking information and my car location service by linking with vehicle guide light, emergency bell etc.

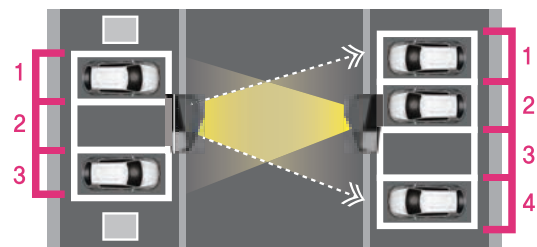

Image camera before parking

Image camera after parking

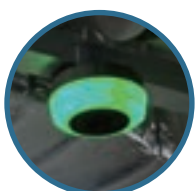

finding my car & checking

Omnidirectional Camera Guidance System

Images of 6 sides of the parking lot are analyzed and linked with 1 omnidirectional parking side camera of 12 million pixels at the same time and this is a system of not only guiding parking status information by floor, area to customers using the parking lot but monitoring vehicles or people passing the passage and providing parking guide and my car position checking service by perfect security, surveillance (41/130/200/3 million pixels) without 360° blind spot

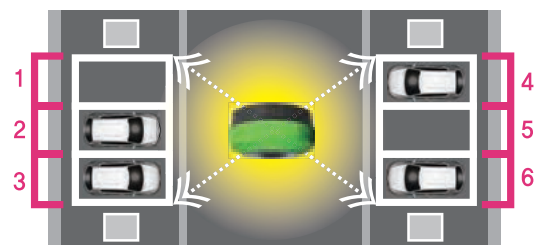

Omnidirectional camera before parking

Omnidirectional camera after parking

Intelligent LED dimming

WEB · MOBOIL System

What is AMANO Web · Mobile System?

▶ Introduction to Web · Mobile System

The Mobile · Web Service of AMANO KOREA makes it possible to create the profits of users and managers and provide convenience.

- Provide not only offline but online service in the rapidly changing society
- Provide a platform based service in communication between parking hardware system and Web · Mobile system in real time

Establish Unmanned Parking Control System in the expansion of Web · Mobile service and Web Parking Management System

▶ Web · Mobile Prepay System

This system shortens the use time through the non-stop process from parking to fee payment and provides convenience of parking.

- Solution to the vehicle bottleneck caused by standby for payment at exit
- Fast passing of drivers with no need to visit parking fee office or unmanned fee calculation machine
- Simple online payment regardless of time and place

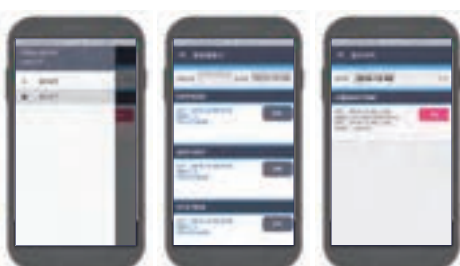

Make "QR CODE" recognized directly with smartphone. It is possible to interact with Prepay System automatically.

▶ Web · Mobile Discount System

This automatic drive-out system gives an ID and a Password to a shop or a work facility that needs a parking discount. A user accesses Parking Discount Website (access with internal network or private fixed IP address) to search for a license plate and a discount time and register the license plate as a discount vehicle before driving out.

- Web-based simple and convenient discount process regardless of places
- Web-based parking discount information offering

Installation of Integrated Web Discount App
The website interacts with the App.
Website: <http://www.mobileparking.co.kr>

Apartment Visitor Vehicle Management System

Composition of the management App system of vehicles which visit apartments

Management system of vehicles which visit apartments

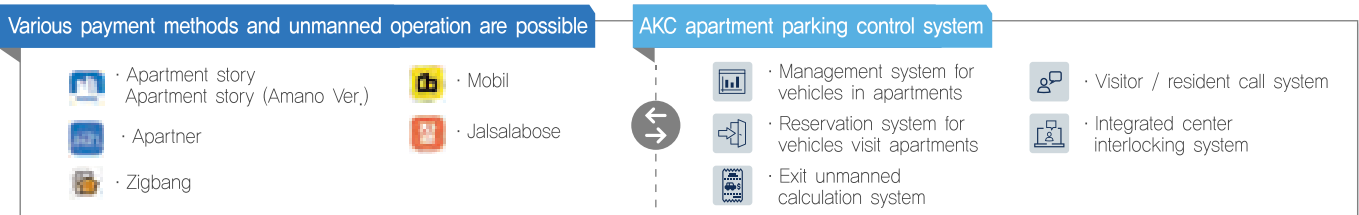

Amano Korea realized mobile-based apartment management software by connecting an apartment management mobile app to a parking control system. Residents can manage vehicles visit them through the app by matching it with the apartment parking system operated by the unmanned security system.

Compatible apartment management web

We realized various and convenient types of apartment management web software.

- Realized apartment management S/W and the reservation system of vehicles in apartments and visiting vehicles.
- Interlocked with apartment web companies and efficiently managed vehicles in apartments and visiting vehicles.

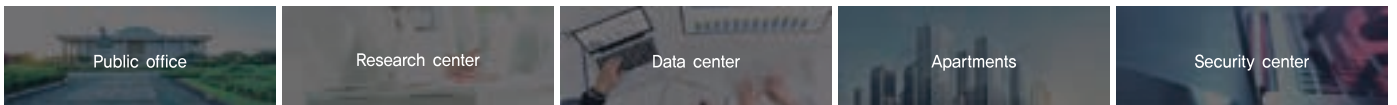

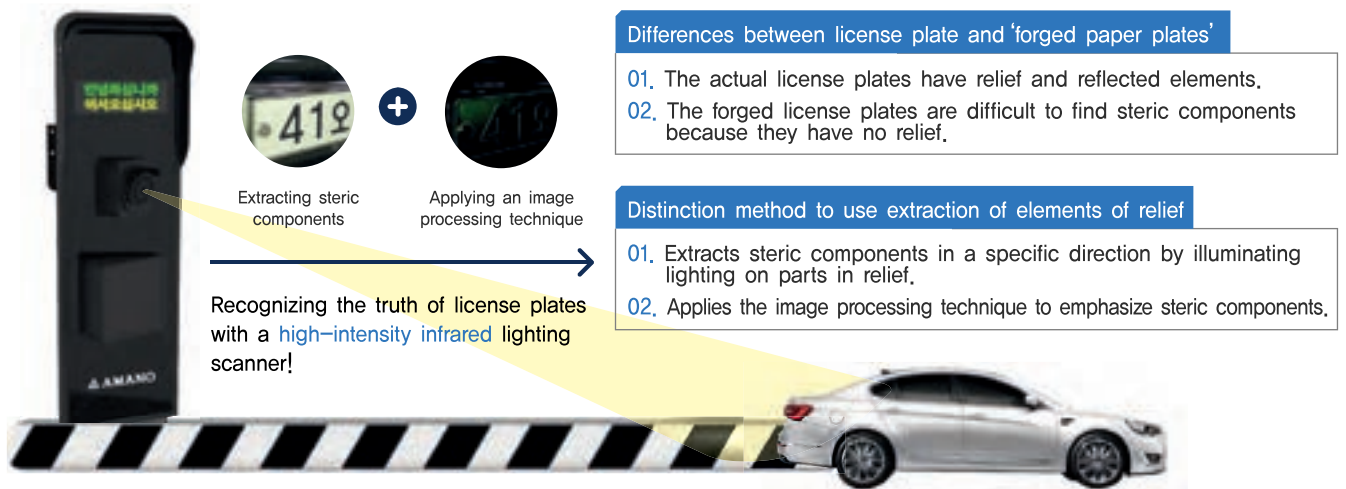

Advantages of application integration of apartment management system

- 01 Pre-registration of visiting vehicles (Real-time application)**
Pre-registration of visiting vehicles by using apartment app and the websites
- 02 Function of blacklists of visiting vehicles (When interlocking with the parking control system)**
Security offices can check vehicles which are not supposed to visit when they do by registering them in the black lists.
- 03 Text transmission of information on visiting vehicles to householders**
License plate numbers of visiting vehicles, cell phone numbers, households visited by the vehicles (blocks/units), and entry time (Text transmission in real time)
- 04 Text transmission of information on visiting vehicles to householders**
Functions to deduct parking time by household, function of calculating parking time by household, etc.
- 05 Automatic issue of passes can reduce guards' work and residents' vehicles can be separated from vehicles which visit apartments**
- 06 Can check information on residents' vehicles and visiting vehicles**
Guards and employees in superindendant's offices can search visiting vehicles by using App.
- 07 Checking information on visiting vehicles through apartment App and the website**
Can check detailed information on visiting vehicles

License plate recognizer for distinguishing forged ones & Camera for photographing appearance

Forged license plate discriminator

Proposer's patent registration number: 10-2355402 Apparatus for determining forgery of vehicle license plate using relief of vehicle license plate

Advantages of Amano Korea's forged license plate discriminator

Providing functions to distinguish forged license plates to strengthen physical security!

Maximizing space efficiency by the integral license plate number recognizer.

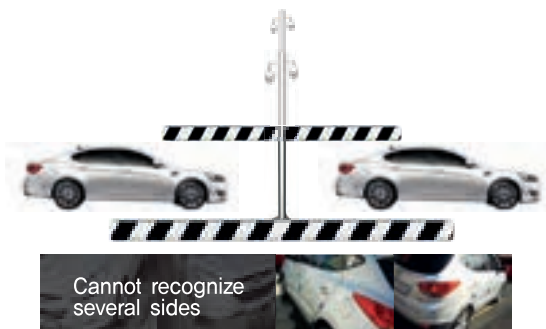

Realizing various customized programs according to types of parking lots!

System for photographing vehicles' appearance

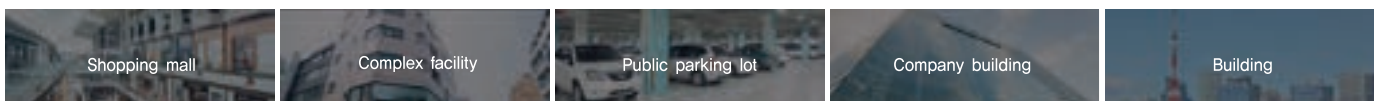

Before

Photographing all directions of vehicles with 4 cameras per lane.

After

Photographing all directions of vehicles and panorama images with 2 cameras per lane.

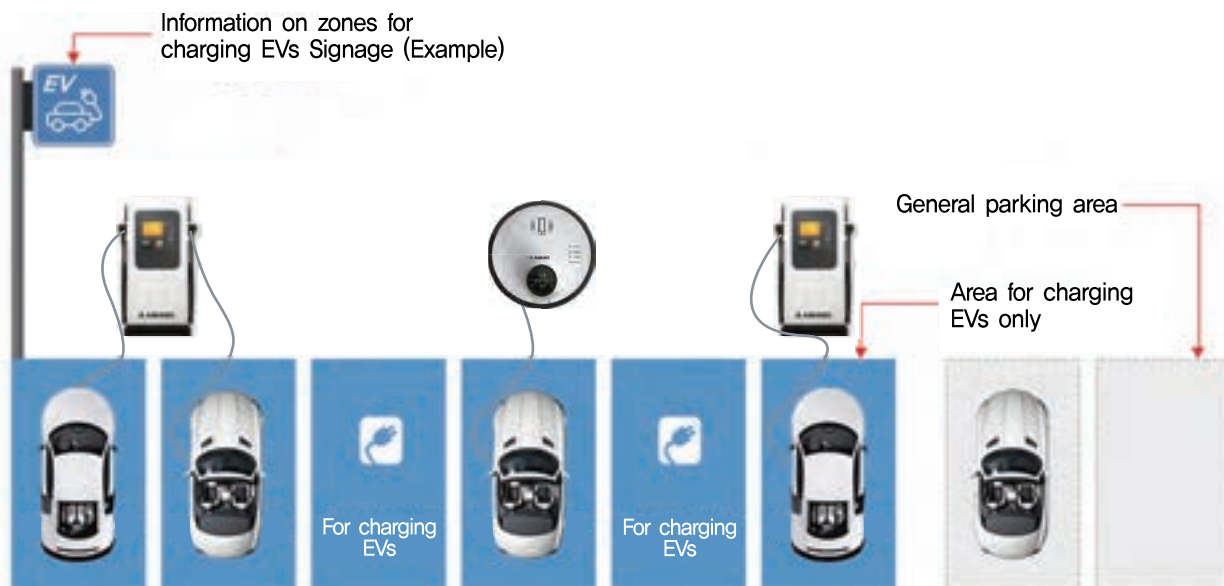

Electric Vehicle Charging system

What is an EV charging system?

▶ Convergent EV charging system

The system saves and manages vehicles which enter as a 2.0 megapixel high performance camera recognizes their license plate numbers, makes users pay in a lump sum by totaling parking fees and EV charging costs up and them go out by the non-stop method by using unmanned adjustment machines.

Smart charging license plate number recognizer

Customer services which combines license plate number recognition for managing parking lots with charging EVs “Solving parking and charging EVs simultaneously when using parking lots with EVs.”

Parking Lot Operation Management Consulting

What is AMANO Parking Lot Operation?

Overview of Parking Lot Operation

Establishment of Parking Lot Order	Management of Season Tickets	Service Education	Work Report
Assignment of manpower in a mixed zone, Intensive control of inappropriate vehicles, Walking safety priority,	Registration and management of season tickets Zone setting based on season tickets, Systematic management,	Quarterly service education, Semi-annual monitoring evaluation, Education based on occupational group	Daily work report, Weekly work report, and Monthly work report for the establishment of report system

Offering of the Best Parking Service

AMANO KOREA CO., LTD. provides the best parking service by manufacturing parking control equipment directly for the first time in Korea and offering parking operation service.

- Based on the best parking management and operation technique in Korea, AMANO KOREA maximizes your revenues.
- By providing the best service for the customers visiting your company, AMANO KOREA helps to improve your corporate image one step further.
- The parking operation management is implemented in line with a variety of customers' needs of parking lots (school, hospital, attached parking lot, and exclusive parking lot).

General hospitals universities distribution facilities wedding halls, etc.

Profit Business Consulting

With its unique know-how, AMANO KOREA creates the profit business model of parking lots by providing various services, including market survey for parking lot management, profit analysis, and the system most suitable for field conditions. If you think of a parking lot to make use of an unused land or create a profit, we optimizes parking system design, parking fee policy, and facility maintenance to generate maximum values of a parking lot and maximize a profit.

Operation Method

Allocation of profits with the exception of operation costs
Management of profits, labor cost, and other costs by company

Advantages

- No burden of facility cost
- Professional parking management
- Minimal stability period through pay parking lot
- Reasonable operation of parking lot operation cost

Designing (system/networked payment system) construction and test operation education

Inquiry of parking lot operation management

“Transparent sales management”

Field Visit, Move line analysis, Profit analysis, Cost analysis

“Professional Operation Management”

Optimal Operation Proposal & Efficient Consulting

“Service Education”

Integrated Control Center

Operation of the integrated control center for 24 hours for 365 days (1899-7275)

► Differentiated management system from other companies

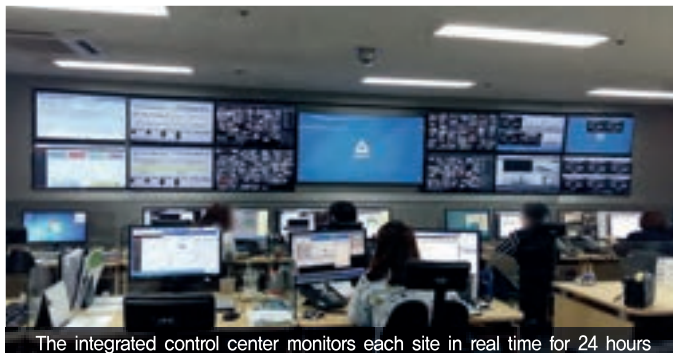

Location: Integrated Control Center of the Head Office of Amano Korea in Yangpyeong-dong, Seoul
 Integrated Control Center in Magok, Seoul (The integrated control center was dualized to prepare for emergency)

Current status of management: Services for responding to customers (drivers)' calls: More than 1,523 places /
 Services for responding to receipt of failure: More than 7,000 places

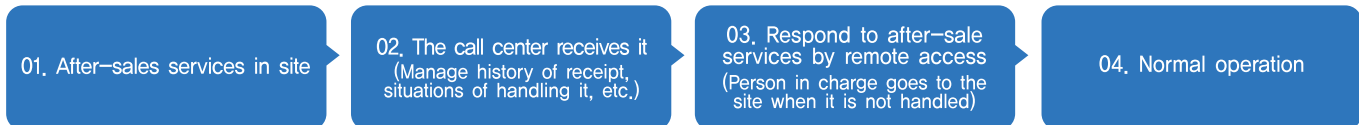

Current status of manpower: 44 counselors and 6 people in the remote response team

► 24HOUR CS SYSTEM

Amano Korea can receive after-sales services anywhere any time by operating the integrated control centers for 24 hours for 365 days. The integrated center's average response time is within 10 seconds and boasts the high response rate of 99.84%.

– PROCESS

► Integrated control center and maintenance

01. The most important point in unmanned parking lots, the importance of the integrated control center and maintenance

As there are unmanned parking lots which reduce costs for managing parking lots, are operated for 24 hours, and can be monitored in real time, the integrated control center that maintenance and quick response to customers is possible for the system's stability is important.

02. Reasonable No. 1 Amano Korea's integrated control center and maintenance services

- Amano Korea treats all the after-sale services in parking lots by itself by operating the call center for 24 hours.
- Employees in call centers professionally respond to 1,500 places.
- More than 80 professional engineers respond to and manage 6,000 places.

Time Stamp Solution

Based on the know-how of time management solution, we provide the systematic and integrated personnel/labor management system using the integrated product & program technology.

Certificate and Patent

(Patent No. 10-1873438)

SYSTEM FOR PAYING PARKING CHARGE USING SMART DEVICE

Certificate and Patent

(Patent No. 10-1901752)

SYSTEM AND SERVICE METHOD FOR INFORMING PARKING POSITION

Certificate and Patent

(Patent No. 10-2023072)

INDOOR LOCALIZATION SYSTEM FOR VEHICLE

Certificate and Patent

(Patent No. 10-2056561)

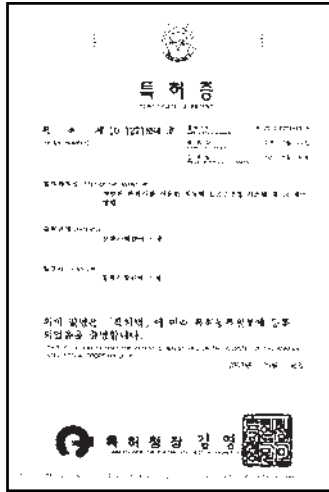

PARKING GUIDE/MANAGEMENT SYSTEM PROVIDING LICENSE PLATE RECOGNITION AND CHARGING FOR ELECTRICAL VEHICLE

Certificate and Patent

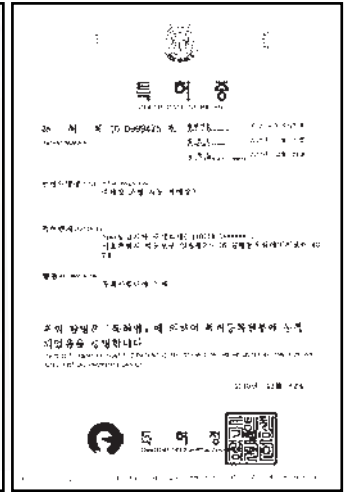

(Patent No. 10-1283839)
Play back license plate number recognition system with security functions

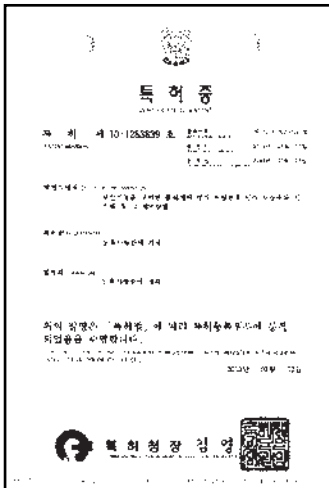

(Patent No. 10-1271894)
INTELLIGENT LED (LIGHT EMITTING DIODE) LIGHTING SYSTEM USING OMNIDIRECTIONAL CAMERA AND METHOD FOR CONTROLLING THEREOF

(Patent No. 10-0768466)
SYSTEM FOR GUIDING PARKING LOCATION

(Patent No. 10-0999475)
AUTOMATIC CONTROL APPARATUS LIGHT IN PARKING AREA

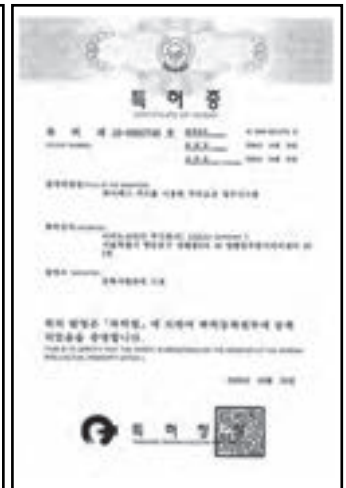

(Patent No. 10-1283839)
Play back license plate number recognition road system with security functions and method for controlling thereof

(Patent No. 10-0818313)
Discount Method and the system for a parking charge of a hospital

(Patent No. 10-0686550)
Appointment parking area management method and the system with parking prevention apparatus

(Patent No. 10-0920746)
Parking fee collection system with high-pass cards

(Patent No. 10-10-1563112)
Car counting system using Omnidirectional camera and laser sensor

(Patent No. 10-1743872)
Vehicle Management System of An Apartment

(Patent No. 10-1764070)
LPR Device Having Electrical Charging Device And License Plate Recognition Function And Outdoor Parking Lot Management System And Method
